MEDISPEC

Pain-Free Performance Starts Here

Big Impact. Smart Design.

Radialspec Neo™*

is a compact Radial Wave Therapy (RWT) system designed for the treatment of superficial musculoskeletal conditions.

Radial Wave Therapy is widely used as a non-invasive therapeutic option for chronic and sub-acute musculoskeletal conditions, particularly where conservative treatments have provided limited relief.

Compact. Mobile. Clinical Proven

- Short Treatment Session
- No Anesthesia Required
- Non-invasive and well tolerated
- Low maintenance requirements

Treats

- Shoulder tendinopathy (with or without calcification)
- Plantar fasciitis (with or without heel spur)
- Lateral and medial epicondylitis
- Trigger points
- Lower back pain (of muscular origin) and more

Built for Modern Clinics. Designed for Growth.

Why Choose Radialspec™ Neo*

- Proven Radial Wave Therapy technology
- High localization precision without imaging
- Intuitive digital interface
- Designed for clinics with limited space and professionals on the move

Typical Protocol

- Outpatient procedure
- 20–30 minutes per session
- 4–6 sessions on average (indication dependent)

Same Clinical Power. Greater Flexibility.

Designed for:

- **Sports Medicine Clinics-** managing chronic and overuse-related musculoskeletal conditions.
- **Rehabilitation & Physiotherapy Centers-** integrating non-invasive modalities into structured treatment programs.
- **Pain Management Clinics-** addressing superficial musculoskeletal pain as part of multimodal care
- **Orthopedic Practices**- supporting conservative treatment pathways for musculoskeletal indications
